ABSTRACT

In 1984, the American Society of Allied Health Professionals (ASAHP) conducted a mail survey of "Cooperative Program Initiatives"--seeking to identify current interdisciplinary training programs established to prepare both health and education professionals to meet the needs of youngsters with handicapping conditions and their families. A total of 350 survey forms were mailed to institutional members of ASAHP, the American Association of Colleges for Teacher Education, University Affiliated Facilities (UAFs), and other institutions with a high probability of conducting interdisciplinary training for professionals serving youngsters with handicapping conditions. Of the 111 survey responses received, 60 institutions reported that they are currently involved in collaborative training programs; 20 of these institutions have collaborative training initiatives between health and education, while 14 have collaborative training initiatives within either health or education. Twenty-six UAFs reported having collaborative training initiatives. Information is provided on the 60 programs, including: name and location; contact person; brief description of program; and the fields of study involved--allied health, regular education, special education, medicine, nursing, or dentistry. The survey instrument is appended. (JW)

ABOUT ASAHP

The American Society of Allied Health Professions (ASAHP) is a national nonprofit scientific and professional organization formed to serve the needs of allied health educators, practitioners, professional institutions and organizations, and others interested in improving health care and health-care education. ASAHP has as its ultimate goal the best possible training and utilization of allied health professionals. As a means to that goal, the Society provides a vital forum in which allied health educators and practitioners--their professional association--can address and act on mutual concerns.

Established in 1967, ASAHP now serves 118 educational institutions, 23 national professional organizations, and over 1,300 individual members.

The Society's role in serving the interests of these constituent groups is twofold, First, it provides a forum for sharing concerns and solutions that relate to significant, mutually-relevant allied health issues. Second, ASAHP serves as the vanguard of the allied health movement--an organization which forcefully and effectively represents positions of over-reaching allied health significance to government, other major health-education and health-care system elements, and the public.

ASAHP's National Office is located at 1101 Connecticut Avenue, N.W., Suite 700, Washington, DC 20036. Telephone (202) 857-1150.

TRAINING ALLIANCES IN HEALTH & EDUCATION

BACKGROUND

In July 1983, the American Society of Allied Health Professions was awarded a three-year grant from the U.S. Department of Education's Office of Special Education and Rehabilitative Services to involve allied health professions in efforts to develop a coordinated delivery-system to meet the education and education-related health needs of children with handicapped conditions. ASAHP's current grant project, "Training Alliances in Health and Education", is designed to support the Society's Advocacy Initiative for Persons with Disabilities. The funding for this project was made possible by the Education for All Handicapped Children Act of 1975 (P.L. 94-142), which mandates the provision of free and appropriate educational services for all children and youth with handicapping conditions between the ages of 3 and 21. ASAHP believes efforts to improve professional collaboration in the provision of education and education-related health services to children with handicapping conditions and to their families should incorporate development of collaborative relationships at the pre-service level among allied health professionals, regular educators, and special educators.

The challenge of the "Training Alliances in Health and Education" (TAHE) project is to design an effective interdisciplinary personnel preparation model for allied health professionals, regular educators, and special eduators that will encourage these professionals as service providers to pursue collaborative efforts in the provision of education and health-related services to children with handicapping conditions. ASAHP believes this project will also serve to improve communication and develop new and stronger alliances among professionals serving children with handicapping conditions.

In order to meet the project's objectives, three ASAHP member institutions of higher education are participating as Professional Development and Dissemination (PRODD) Centers for the project:

- California State University-Fresno
- Northern Illinois University
- Virginia Commonwealth University

Under the leadership of the Deans of Allied Health and with the cooperation of the Schools/Programs of Teacher Education, Special Education, and Allied Health (with technical assistance provided by ASAHP National Office staff), the PRODD Centers are designing, implementing, and disseminating model inter-disciplinary training curricula. These model programs integrate "Generic Competencies" identified as appropriate for all professionals serving youngsters with special needs--health and education alike.

The National Office project staff has conducted a nation-wide survey, as a component of TAHE to identify existing and planned collaborative training programs for allied health and education professionals serving youngsters with handicapping conditions. The survey results are included in this report titled: Training Alliances in Health and Education: Cooperative Program Initiatives Survey.

For additional information on the TAHE project activities contact:

COOPERATIVE PROGRAM INTIATIVES SURVEY

INTRODUCTION:

During the early months of 1984, the American Society of Allied Health Professions (ASAHP), through the efforts of its current grant project, "Training Alliances in Health and Education" (TAHE), conducted a mail survey of "Cooperative Program Initiatives"--seeking to identify current interdisciplinary training programs established to prepare both health and education professionals to meet the needs of youngsters with handicapping conditions and their families.

350 survey forms (See Appendix A) were mailed to institutional members of the American Society of Allied Health Professions (ASAHP), The American Association of Colleges for Teacher Education (AACTE), University Affiliated Facilities (UAFs), and other institutions with a high probability of conducting interdisciplinary training for professionals serving youngsters with handicapping conditions.

Of the 111 survey responses received, 60 institutions reported they are currently involved in collaborative training programs, while 55 institutions reported they are not involved in collaborative training programs.

Based on the range of information provided by the survey respondents of the 60 institutions currently involved in collaborative training programs, a further categorization of survey results revealed:

- 20 institutions have collaborative training initiatives between health and education;
- 14 institutions have collaborative training initiatives within either health or education; and
- 26 University Affiliated Facilities (UAFs) reported collaborative training initiatives.

San Juan, Puerto Rico 00936

TELEPHONE: (809) 753-5367

PROGRAM INFORMATION: Center for Interdisciplinary Evaluation and Treatment was established in 1980 as a cooperative endeavor between the College of Health Related Professions, which wanted to develop an interdisciplinary clinical practice setting for its students and faculty, and the Puerto Rico Department of Education, which needed related services for the handicapped population. The Puerto Rico Department of Education funds the program. It is the goal to develop a model program with an interdisciplinary team approach (involving health and education) in the evaluation and treatment of the handicapped child.

DELAWARE TECHNICAL AND COMMUNITY COLLEGE

Allied Health Department
333 Shipley Street
Wilmington, Delaware 19801

TELEPHONE: (302) 571-5355

PROGRAM INFORMATION: Dental Hygiene for the Special Patient is a course offered by the Allied Health Department to second year Dental Hygiene students. The Allied Health Department in cooperation with private residential centers and the public school systems in the Wilmington area (see chart "Programs Participating") provide free dental care to disabled children and adults. Dental Hygiene students gain valuable personal and clinical experiences in both treating and understanding the specialized needs of persons with disabilities.

FITCHBURG STATE COLLEGE

PROGRAM INFORMATION: Speech and Hearing Handicapped Curriculum of the graduate program is designed to prepare teachers of the speech and hearing handicapped to provide educational services to children or adolescents through related service, resource room, or special class delivery modes. In addition to completing the Communication Sciences Program, graduate students in the Speech and Hearing Curriculum must complete additional coursework in one of three special education concentrations: learning disabilities, severely and multiply handicapped, or hearing impaired. The interdisciplinary coursework/training offered in this curriculum provides students with understanding of the contributions of many disciplines and the specialized skill training needed to provide competent services to communicatively handicapped children and adolescents. Degree requirements in this curriculum are 58 credits.

Education Department
Lynchburg, Virginia 24501

TELEPHONE: (804) 522-8381

PROGRAM INFORMATION: Mainstreaming in Elementary/Early Childhood Education is an undergraduate program for students enrolled in teacher preparation programs. It is the goal of the program to acquaint regular class teachers with the characteristics and learning needs of handicapped children and youth. It is required that all regular class teachers enroll in a course "Survey of Special Education" and have related field experience prior to their student teaching. This initiative has led to a far greater understanding of the nature of handicapping conditions by students and has encouraged regular education students to pursue a minor in the area of special education. The stimulus for this training program was a combination of professional concerns as well as directives under the Virginia State certification regulations.

Health Education Family and Community Medicine Student Health Center	Physical Education Higher Education	Graduate Course	Selected Courses (graduate level)	Selected Courses (graduate level)	

CONTACT: Dr. William H. King
Professor and Director of Health Education Program

ADDRESS: University of Arizona
School of Health Related Professions
Room 127-1435 N. Fremont
Tucson, Arizona 85719

TELEPHONE: (602) 626-2425

PROGRAM INFORMATION: The Health Education Program offers both a four-year Bachelor of Science (B.S.) degree in Health Sciences with a teaching and non-teaching option and a one year Master of Education (M.Ed.) degree with a major in Health Education and specializations in either Secondary Education, Higher Education, or Special Education. The program provides teacher certification at both the undergraduate and graduate level for elementary, secondary, higher education, and community health educators.

PROGRAMS PARTICIPATING

UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES

TITLE: MASTERS PROGRAM IN COMMUNICATIVE DISORDERS
(Speech-Language Pathology and Audiology Options)

ALLIED HEALTH	REGULAR EDUCATION	SPECIAL EDUCATION	MEDICINE	NURSING	DENTISTRY
Audiology Speech-Language Pathology					

CONTACT: Ronald H. Winters, Ph.D.
Dean

ADDRESS: College of Health Related Professions, Slot 619
4301 West Markham
Little Rock, Arkansas 72205

TELEPHONE: (501) 661-5730

PROGRAM INFORMATION: The Masters Program in Communicative Disorders was established through a consortium utilizing the resources of the University of Arkansas Medical Sciences campus and the entire University of Arkansas campus, both located at Little Rock. By participating in clinical training at the Medical Sciences campus, students have the advantage of working with faculty members at the Ambulatory Care Center and Children's Hospital. At the University of Arkansas campus, students have the advantage of specialized training in a fully-equipped and functioning speech-language and hearing clinic. A goal of the program is to train professionals who can successfully evaluate and treat speech-language and hearing-impaired children and adults. Special funding is provided by a private foundation in Arkansas, as well as budget support from the medical and allied health departments.

UNIVERSITY OF FLORIDA

TITLE: CENTER FOR ALLIED HEALTH INSTRUCTIONAL PERSONNEL

PROGRAMS PARTICIPATING

ALLIED HEALTH	REGULAR EDUCATION	SPECIAL EDUCATION	MEDICINE	NURSING	DENTISTRY
Clinical Psychology Dental Assistance and Dental Hygiene Dietetics Health Education Administration Medical Technology Nutrition Occupational Therapy Physician Assistance Physical Therapy Rehabilitative Counseling	Post-Secondary	Teacher Preparation	Teacher Preparation	Master and Doctoral Programs in Education	Teacher Preparation

CONTACT: Margaret K. Morgan
Professor, Director

ADDRESS: University of Florida
Center for Allied Health Instructional Personnel
ILS Department, College of Education
Gainesville, Florida 32611

TELEPHONE: (904) 392-2391

PROGRAM INFORMATION: The graduate program of the Center for Allied Health Instructional Personnel is designed to prepare practitioners and clinicians from the health related professions to assume leadership roles in education and research. The program was developed to meet a clearly defined need for academic teachers to move into programs previously conducted in the hospital setting.

Educational goals in this program would include (but not be limited to) a Masters and Doctors degree in the college of education with major emphasis on one of the following areas:

- Health Occupations Education
- Curriculum and Instruction
- Counselor Education
- Education Administration (Higher Education)
- Special Education
- Educational Media

Students may seek advanced degrees in other fields such as psychology, physiology, microbiology, and anatomical sciences.

PROGRAMS PARTICIPATING

UNIVERSITY OF FLORIDA

TITLE: PROTEACH

ALLIED HEALTH	REGULAR EDUCATION	SPECIAL EDUCATION	MEDICINE	NURSING	DENTISTRY
Health Education and Administration Adaptive P.E. Nutrition Occupational Therapy Physical Therapy School Psychology Speech-Language Pathology		Special Education	Pediatrics		

CONTACT: Catherine Morsink
Chairperson, Special Education

ADDRESS: University of Florida
G315 Norman Hall
Gainesville, Florida 32611

TELEPHONE: (904) 392-0702

PROGRAM INFORMATION: Protech is a 5 year Masters degree special education teacher preparation program. Proteach has two program options: one is designed to prepare a teacher of the severely handicapped, the other to prepare a teacher of the mentally handicapped. It is anticipated that each student completing either of these options will be certified in two or more categories of special education, including Mental Retardation, Specific Learning Disabilities, Emotional Handicaps, and Motor Disabilities. Both options include coursework specialization outside special education (i.e., Health Related Services, Adaptive P.E., Speech-Language Disorders, Psychology).

UNIVERSITY OF ILLINOIS AT CHICAGO

PROGRAMS PARTICIPATING

ALLIED HEALTH	REGULAR EDUCATION	SPECIAL EDUCATION	MEDICINE	NURSING	DENTISTRY
Dietetics Nutrition Social Work			Psychiatry General Medicine	Public Health General Undergraduate	

CONTACT: Marcia Lipetz, Ph.D.
Assistant Professor

ADDRESS: Center for Education Development
University of Illinois at Chicago
808 South Wood Street
Chicago, Illinois 60612

TELEPHONE: (312) 996-7653/3590

PROGRAM INFORMATION: Allied Health disciplines were involved in three interdisciplinary program offerings funded for the 1984 spring semester:

1. Foundation of Interprofessional Teamwork: An Undergraduate Project in Interviewing, Nutritional Assessment and Goal Setting - Oriented to providing sophomore nursing students and junior nutrition and medical dietetic students opportunities to enhance patient assessment, interprofessional referrals and collaboration, and community skills.

2. Latch Proposal - Psychiatry - To enhance health care, education, and research, and to allow health professionals and students access to multiprofessional literature centered on specific patient problems.

3. Proposal for an Interdisciplinary Experience for Students and Trainees in Team-Building and Team Care Geriatrics - Proposed the development of an Interdisciplinary Conference on Geriatrics and Gerontology conducted for and by students and trainees in the summer, 1985. Special program funding was provided from Vice Chancellor for Health Affairs and matched proportionately by each participating college.

Psychology Dietetic Medical Technology Occupational Therapy Physical Therapy Rehabilitative Counseling Social Work Recreation Gerontology	Elementary Secondary	Elementary Secondary	Adolescent Pediatrics	Maternal Child Psychiatric Mental and Community Health	Dental Hygiene

CONTACT: Jennie D. Seaton
Assistant Dean

ADDRESS: Virginia Commonwealth University
School of Allied Health Professionals
MCU Box 233
Richmond, Virginia 23298-0001

TELEPHONE: (804) 786-1913

PROGRAM INFORMATION: During the 1985 Fall semester, the PRODD (Professional Development and Dissemination) Project and the Virginia Institute for Developmental Disabilities co-sponsored a student symposium and a seminar series for students from helping disciplines that serve persons with disabilities. The PRODD project is a joint effort by the School of Allied Health Professions and the School of Education to prepare teachers and health practitioners to deliver comprehensive and coordinated services. The Virginia Institute for Developmental Disabilities is a University Affiliated Facility satellite. The symposium and seminar series have been planned by two interdisciplinary task forces that include representatives from various university departments and schools (see chart "Programs Participating"). Students and agency representatives also participated.

The purposes of the Symposium were to increase awareness of other disciplines, to facilitate interdisciplinary interaction among students, and to determine on-going activities that students from various disciplines could engage in throughout the year. The primary goal of the seminar series was to bring together students from various helping professions to study and discuss issues related to the delivery of interdisciplinary services to persons with disabilities and to their families.

WESTERN MICHIGAN UNIVERSITY

TITLE: MULTICLINIC

PROGRAMS PARTICIPATING

ALLIED HEALTH	REGULAR EDUCATION	SPECIAL EDUCATION	MEDICINE	NURSING	DENTISTRY
Occupational Therapy Physician Assistance Social Work Audiology Speech-Language Pathology Biomedical Sciences Blind Rehabilitation Gerontology	Psychology Reading Center/ Clinic	Elementary Secondary			

CONTACT: Elissa Gatlin
Director, Center for Human Services

ADDRESS: Western Michigan University
Center for Human Services
MULTICLINIC
Kalamazoo, Michigan 49008

TELEPHONE: (616) 383-4941

PROGRAM INFORMATION: MULTICLINIC was established in 1972 as an attempt to provide an interdisciplinary diagnostic clinic for multiply-impaired children and adults. MULTICLINIC provides special training for professionals to promote team care in delivering services to persons with handicapping conditions. Referrals to MULTICLINIC are accepted from professional personnel including public school teachers and specialists, physicians, and social service agencies. MULTICLINIC candidates are selected and then assessed by faculty and staff of participating departments and programs. Students benefit from observing a video presentation of MULTICLINIC activities and then discussing clinical proceedings with faculty.

UNIVERSITY AFFILIATED FACILITIES

UNIVERSITY AFFILIATED FACILITIES

Over 50 University Affiliated Facilities (UAFs) exist throughout the United States to address the critical need for a coordinated program of professional and technical resources responsive to the needs of children and adults with developmental disabilities. University Affiliated Facilities (UAFs) were the first major federally supported initiative (through Public Law 88-164) to provide interdisciplinary training and diverse health care for persons with mental retardation. Subsequent legislation has expanded the national scope of concern to include other disabilities, such as autism, cerebral palsy, epilespy, and severe learning disorders.

Located in major universities or teaching hospitals, UAFs provide interdisciplinary training, exemplary service, dissemination of information, technical assistance, and applied research. The primary mission of the UAF is to reduce both the incidence and impact of mental retardation and developmental disabilities through four distinct programmatic activities:

1. **Interdisciplinary Training** - The primary goal of UAF training is the development of professional leaders who will establish a coordinated continuum of services which addresses all aspects of development. Disciplines represented in UAF training include those concerned with physical, medical, nutritional, speech, hearing, visual, educational, dental, social, psychological, and vocational aspects.

2. **Exemplary Services** - UAFs are committed to exemplary maternal and child health research and practice. A full range of comprehensive services--screening, evaluation, planning care, treatment, education, advocacy, and personal support--are provided for involved individuals and their families.

3. **Technical Assistance and Information Dissemination** - UAFs disseminate new methods of prevention and treatment of developmental disabilities.

4. **Research** - UAFs help to ensure that the most current knowledge on prevention and treatment of developmental disabilities is available to service agencies by collaborating with other federally sponsored agencies in defining and addressing issues of concern to all persons with developmental disabilities. Some of the issues include: continuing education for a variety of health, education, and behavioral science professions; and the development of curriculum materials, service programs, and technology designed to address the needs of unserved or underserved populations.

The TAHE project staff believes there is a wealth of untapped resources available through the UAF network in the development of interdisciplinary curricula, programs, and initiatives to address the diverse needs of persons with handicapping conditions.

For additional information on University Affiliated Facilities (UAFs) you may contact:

Dr. William Jones
Executive Director
American Association of University Affiliated
Programs for Persons with Developmental Disabilities
(AAUAP)
8605 Cameron Street
Silver Spring, Maryland 20910
(301) 588-8252

Each UAF publishes an Annual Report containing information on specific interdisciplinary courses and program initiatives.

CONTACT: Ronald Goldman, Ph.D.
Training Director

TELEPHONE: (205) 934-5471

PROGRAM INFORMATION: The Early Developmental Project is a model interdisciplinary assessment and treatment program for infants and young children. The goal of this Project is to train graduate students to assess and provide services for handicapped infants and young children from an interdisciplinary perspective. In addition, the faculty involved in the Early Developmental Project provide in-service training and consultation on program development for other professionals in the state who are working with handicapped and "at risk" infants and young children.

Training Coordinator

TELEPHONE: (404) 542-6970

PROGRAM INFORMATION: UAF Interdisciplinary Training is an interdepartmental program for all University students enrolled in programs which require observation of, or participation with children/adults with developmental disabilities. The major objectives for student trainees who participate in the Georgia UAF Interdisciplinary Training Program are:

1. To understand the role and contribution of other disciplines to the services required by the developmentally disabled.
2. To possess a conceptual framework within the human services network;
3. To be able to apply disciplinary knowledge and skills in programs for the developmentally disabled.
4. To work effectively on an interdisciplinary team.

* Brochures describing various networking initiatives and interdisciplinary outreach programs, as well as a description of Core Curriculum and Interdisciplinary Training Program are available upon request for the cost of copying and postage.

David Schiller, M.S.W.
Pre-Service Training Coordinator

TELEPHONE: (404) 542-8970

PROGRAM INFORMATION: The University Affiliated Program of the University of Gerogia supports pre-service training for University students who are enrolled in practica or internships or enagaged in research in the field of developmental disabilities.

The objective of this program is to prepare University students to assume positions of clinical and/or administrative leadership in the field of developmental disabilities. To accomplish this objective, the UAF sponsors lectures, seminars, and other inter-disciplinary learning experiences which supplement and/or complement the course offering of participating departments.

Areas of emphasis are: (1) clinical knowledge bases and applications in the field of developmental disabilities; (2) the service delivery system; (3) interdisciplinary team functioning, case-management, and team leadership; (4) research and program evaluation; and (5) values and ethics.

PROGRAM INFORMATION: Enabling legislation for University Affiliated Facilities (UAF) provided stimulus for this collaborative training program which began in 1970. Thirteen participating disciplines (see chart "Programs Participating")—with faculty and experts in the field of mental retardation (MR) and developmental disabilities (DD)—provide interdisciplinary training, both pre-service and in-service to students and parents.

COOPERATIVE PROGRAM INITIATIVES SURVEY

ASAHP
Vanguard of the
Allied Health Movement

American Society
of Allied Health Professions

1101 Connecticut Avenue, N.W., Suite 700, Washington, D.C. 20036 202/857-1150

February 23, 1984

Dear Colleague:

In July 1983, the American Society of Allied Health Professions (ASAHP) was awarded a $500,000 grant from the U.S. Department of Education's Office of Special Education and Rehabilitative Services. The grant project, Training Alliances in Health and Education, will facilitate the development of model interdisciplinary training programs at the pre-service level for allied health professionals, regular educators, and special educators serving children with handicapping conditions and their families.

One of the major components of this project is to collect information on existing interdisciplinary training programs in allied health, regular education, and special education. Collaboration and coordination of pre-service training programs in health and education have been identified as critical prerequisites for preparing competent providers of services to youngsters with disabilities. While integration exists among many regular and special education programs, few training programs have been documented which illustrate strategies for effective collaboration among the health and education professions.

Your assistance would be greatly appreciated in helping the Society to identify successful programs around the country which have existing (or planned) interdisciplinary programs to prepare health and education professionals to serve persons with handicapping conditions and their families.

The enclosed questionnaire is provided for your response regarding your institution's cooperative program initiatives. Please return this questionnaire by March 30, 1984 to:

The American Society of Allied Health Professions
1101 Connecticut Avenue, N.W.
Suite 700
Washington, D.C. 20036
ATTN: TAHE SURVEY COORDINATOR

Again, thank you for your willingness to assist ASAHP in this data collection project.

Sincerely,

Carolyn Del Polito
